

The **Princess Charlene of Monaco Foundation** saves lives by fighting against drowning and develops the education of children through the **values of sport**.

The **Foundation** is committed to building a world where children from all backgrounds can thrive in a safe environment and learn to live together.

**H.S.H. Princess Charlene**, witness to the devastating reality of drowning and aware of the positive changes that sport can bring to one's life, created Her Foundation with the will to provide more opportunities for children around the world.

Created on **December 14, 2012**, the Foundation supports and funds educational projects worldwide via 3 programmes.

To protect children from avoidable injuries and to prevent drowning, the **Learn to Swim** and **Water Safety** programmes provide theoretical and practical training to children and adults and raise public awareness of water hazards.

To inspire future generations and contribute to the well-being of children, the **Sport & Education** programme organises sports events and encourages everyone to take up a sport.

In 10 years of action, more than **1 million people** have benefited from the Foundation's programmes in **43 countries**.
